# **Delivering the difference in pharma**

**Integrated solutions that  
unlock the potential of your  
business, at every level.**

A woman and a man are working together on a machine in a factory setting. The woman is looking at the camera with a slight smile, while the man is focused on the machine. The machine has a green light on it. The background shows a factory floor with various equipment and materials.

# Unlocking potential

**Do you wonder if you're getting the most out of your machines, your lines, your sites, your production, your value chain? Do you crave greater efficiency and less downtimes to improve your OEE? Do you feel software should be having a bigger impact on your business?**

Körber is here to make the difference! With over 125 years of in-depth pharma technology expertise, we truly understand the process and regulation challenges you face day to day, from the beginning to the end of your production. This is why we offer a unique portfolio of integrated solutions, spanning consultancy, inspection, handling, packaging machines and materials, track and trace, and software, giving you everything you need to unlock the potential of your productivity and your business. In an industry that has to adhere to stringent safety and regulatory standards,

and is reliant on the optimization of production, you are looking for someone to deliver, and that is what we do. As your personal partner, as a system integrator, a service provider and a product vendor, with our dedicated people, our global footprint, our decades of software and hardware expertise in pharma, we deliver on safety, we deliver on productivity, we deliver on the promises we make. We deliver the difference your business needs.

Körber Pharma –  
Delivering the difference

# Our broad offering

## Consulting

As your personal partner and your pharma technology expert, Körber delivers industry leading consultancy supporting you from requirement analysis to project implementation.

## Inspection

With world leading high-performance inspection machines, semi-automatic and laboratory equipment and inspection applications, Körber offers an unrivaled level of quality for customized inspection solutions.

## Handling

With complete handling systems for pharmaceutical and medical products, Körber delivers automated, flexible and secure product transport and tray systems.

## Packaging machines

As a leading supplier of primary and secondary pharmaceutical packaging machines, Körber delivers the difference by maximizing the OEE of your lines and providing flexibility to address future market requirements.

## Packaging materials

As the specialist in pharmaceutical cardboard packaging, Körber delivers innovative and high-quality packaging solutions that make the difference.

## Track & Trace

As the partner for integrated Track & Trace solutions from level 1 to level 5, Körber delivers the difference through coding, serialization and aggregation to data management all from one source.

## Software

With our world leading PAS-X Manufacturing Execution System (MES) and software solutions, Körber delivers the difference by unlocking the potential of pharmaceutical and biotech value chains.

# Consulting

- Access industry leading experts that know pharma, biotech, and medical devices inside out
- Benefit from agile pharma project management combined with methodical execution according to GAMP®5
- Design a solution specific to your business size and needs

# Inspection

- Leave nothing to chance with the highest compliance and regulatory standards
- Benefit from 125 years of engineering expertise in the pharma industry
- Maximize your OEE with customized cutting-edge inspection technologies

# Handling

- Transport products with confidence through your entire process
- Maximize line efficiency by using accumulators
- Simplify product storage, improve organization time and boost your production with automated tray handling systems

A man with glasses and a mustache, wearing a white t-shirt, is leaning over a piece of industrial machinery. He appears to be inspecting or working on a small white box that is part of the machine's output. The background is blurred, showing more of the industrial setting.

# Packaging machines

- Take advantage of our engineering and packaging development expertise
- Optimize production and increase operational efficiency
- Achieve reliable production on the highest level of quality

A woman with dark hair, wearing a white sleeveless top with a black floral pattern, is smiling and looking upwards. She is holding a white, open, multi-compartment packaging box. In the background, a laptop screen is visible, showing some data or a graph. The setting appears to be an office or a laboratory.

# Packaging materials

- Choose cost-efficient and GMP-compliant packaging to secure your demands and maximize OEE
- Benefit from counterfeit protection, serialization and specialized folding cartons to protect your products
- Use our wide range of services from innovative packaging development, on demand supply to smart packaging solutions

# Track & Trace

- Customize your solution with a modular and scalable approach on every level
- Make life easy with complete turnkey projects for regulated industries
- Ensure unique identification and tracking

# Software

- Save time & effort and avoid risk
- Boost your production performance and quality – paving the way to operational excellence and leaner manufacturing
- Benefit from predictive analytics & data science, KPI monitoring, plug & produce solutions, enterprise manufacturing intelligence and much more

**Unlocking your  
production  
potential through  
an unrivaled  
breadth of  
technologies  
and depth  
of expertise all  
along the pharma  
value chain.**

## Unique combination and integration

of cutting edge software & hardware

## Setting industry benchmarks

with the highest safety and quality requirements of the pharmaceutical regulatory standards

## Process expertise

all along the pharma value chain from clinical trial to serious production

# Global player

part of an international technology group

# Comprehensive knowledge

from packaging design, to software systems,  
to shop floor equipment, to packaging materials,  
to consulting, to turnkey solutions

# 125 years

of dedicated pharma experience  
and technical excellence

# Part of a global technology group

**The Körber Group is shaped by around 10,000 employees around the world. Our activities span over five Business Areas where we turn entrepreneurial thinking into customer success and foster technological change. Each Business Area develops products, services and processes that inspire and consider the changing market demands. The expertise and passion of our employees combined with undisputed customer focus are the key drivers of our success. We are increasingly building on ecosystems that solve the challenges of today and tomorrow.**

**We are the home for entrepreneurs – we turn entrepreneurial thinking into customer success.**

## Digital

The Business Area Digital shapes and strongly promotes the digital advancement of the entire Group and develops new digital business models for AI-powered manufacturing efficiency.

## Supply Chain

The Business Area Supply Chain offers a wide range of proven solutions that enable our customers to conquer the complexity of the supply chain.

## Tobacco

The Business Area Tobacco is the leading supplier of solutions for the international tobacco industry and supports its customers in the fields of tobacco processing, filter and cigarette manufacture, measuring and analysis equipment, and flavorings.

## Pharma

The Business Area Pharma offers solutions for safe and efficient processes in the manufacturing, inspection and packaging of pharmaceutical products.

## Tissue

The Business Area Tissue is the technology and market leader in developing machines and process solutions for tissue products.
