

INTERACTIVE DESIGN FOR STRYKER GROUP

Visual and acoustic ergonomics

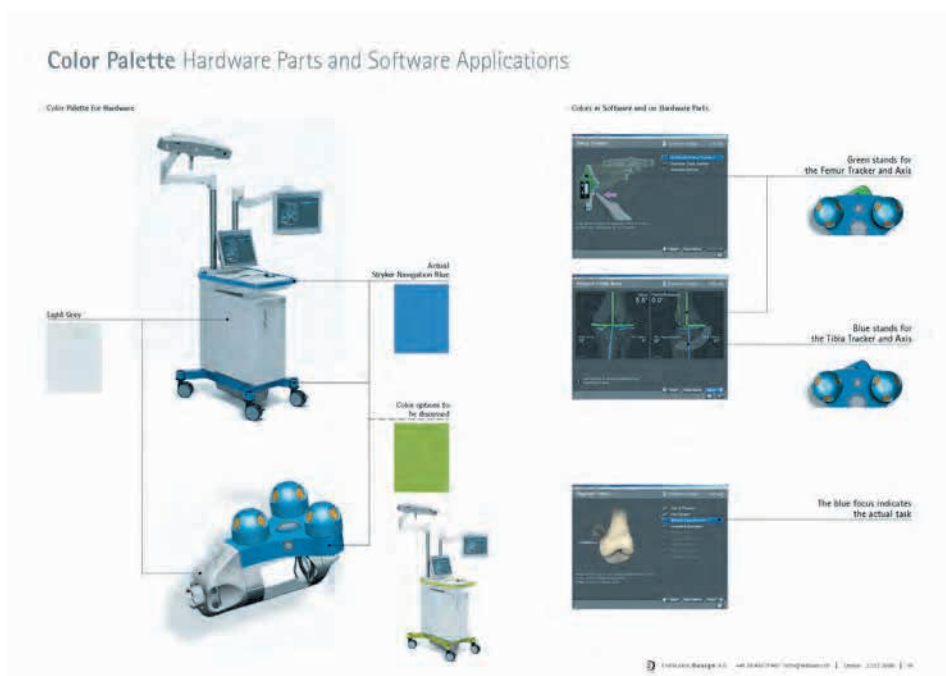

Esthetically sophisticated visual language and precise user guidance define the Stryker screen design.

In modern operating rooms, screen-controlled navigation is an indispensable aid for surgeons.

The surgeon's work with a screen as a tool requires clear language for user guidance.

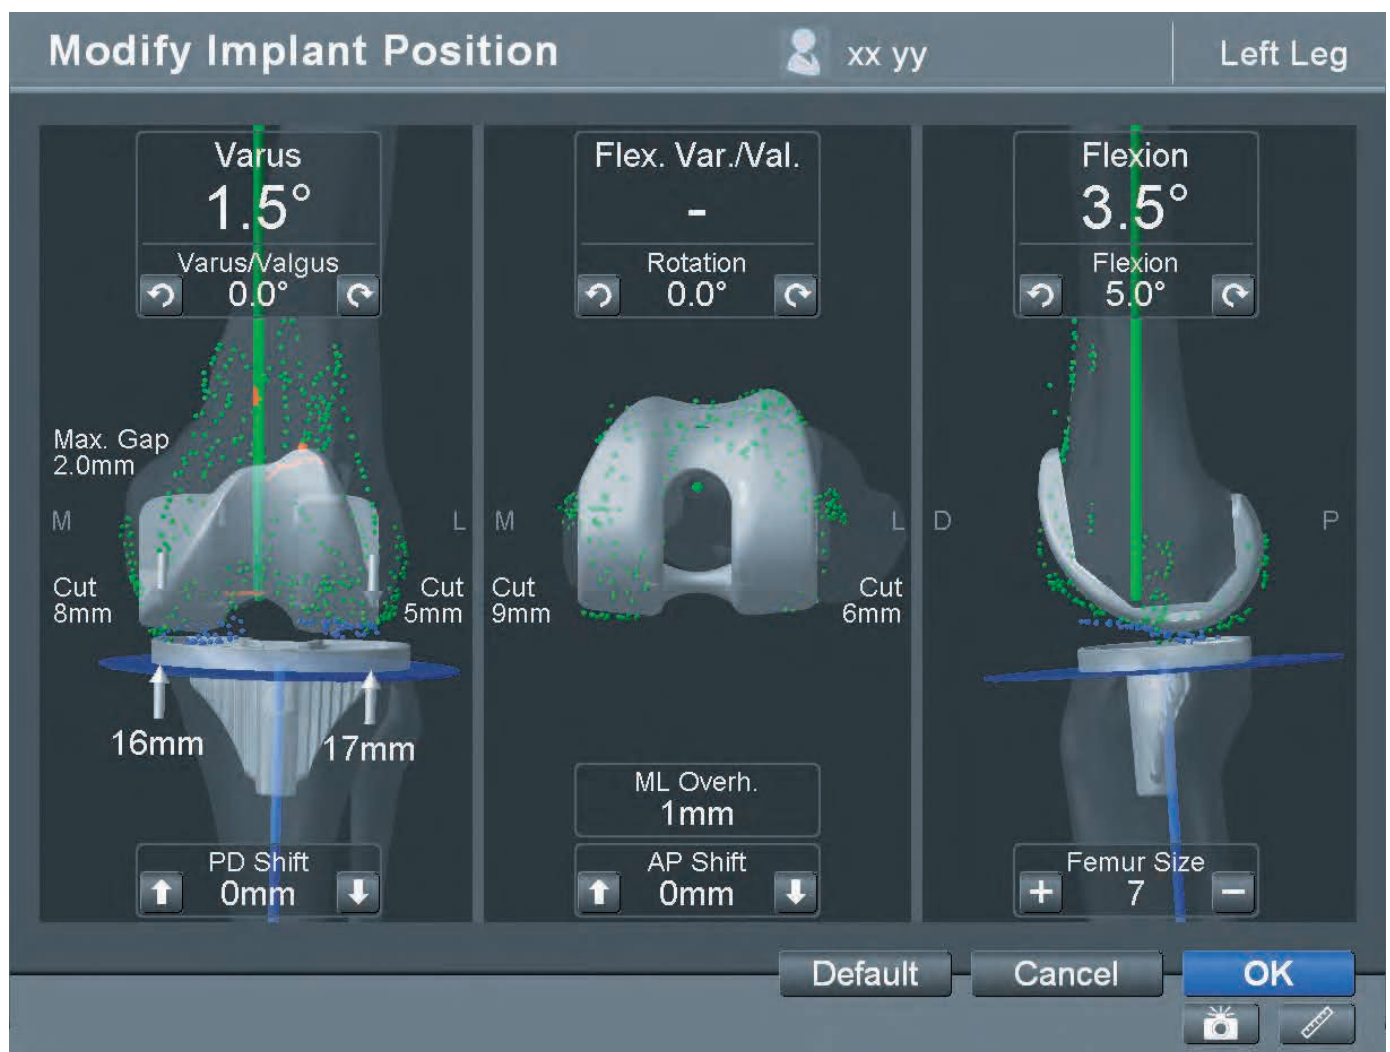

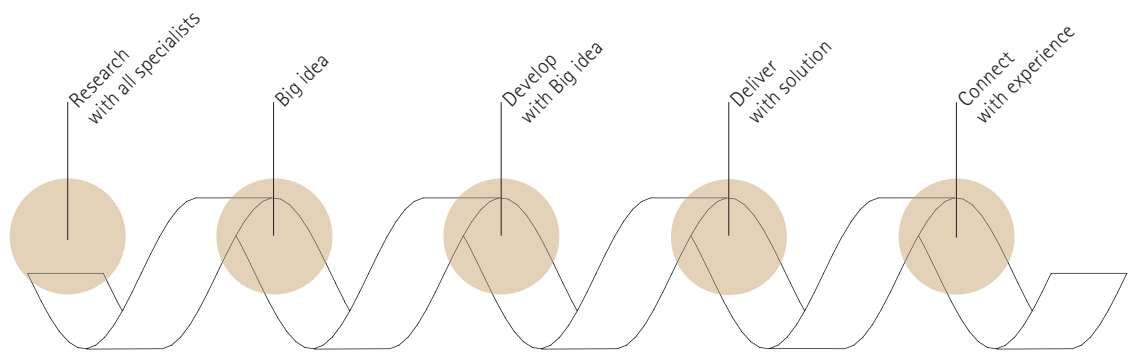

The connection between screen and industrial design in the Corporate Style Guide.

Erdmann Design designed and implemented a user interface for Stryker in the area of knee navigation.

The distinctive user guidance, the visual appearance and the acoustic quality of the sound design has been successful and set standards in the medical design field.

Together with the Stryker engineers and programmers, it was possible to develop a Style Guide which is used as a precise basis and example for developments in other areas.

Projects since 1999

Sub-projects:

GUI design

Sound design

Pictograms

Interaction

Design workflow

Standardization style guide
